

## Valuable Energy and Safety Education for schools served by Vectren.

Vectren is supporting teachers in educating students on required energy standards. Energy Safe Kids will take place at schools in your area AT NO COST! Teachers and students learn about energy and safety by taking part in a presentation at school.

- In-school presentation (45 – 60 min)
- Every student receives a take-home safety booklet
- Program correlated to state, NGSS and Common Core Standards
- Easy implementation with online data collection
- Teachers may earn a mini-grant of up to \$50
- 4<sup>th</sup> Grade
- September 17 – October 12, 2018

Teachers and parents strongly support this program:

"The program was really informative, connected to our grade level state standards, and was really engaging for the students."

"This engaging program effectively addresses several standards with a hands-on approach to science. Students were engaged throughout the entirety of the program."
