# ELECTRICAL SAFETY

Complete the instructions on each square using the images on the front of this activity.

Lightning is dangerous and can hit all sorts of things!

**Cross out** the lightning and the trees it hit.

Make sure that you never touch a frayed line.  
Put an **X** over the frayed line.

Use power strips to avoid overloading outlets.

On the power strip, write **S** for safe or **NS** for not safe.

Outlets are NOT for touching.

On the outlet, write **S** for safe or **NS** for not safe.

Which number should you call before you dig?

Draw a **star** over it!

Be careful to never use electrical appliances near water.  
Put a **star** on top of any water you see.

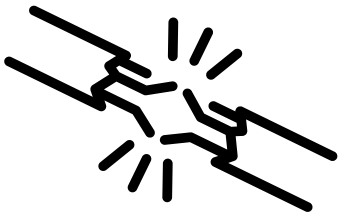

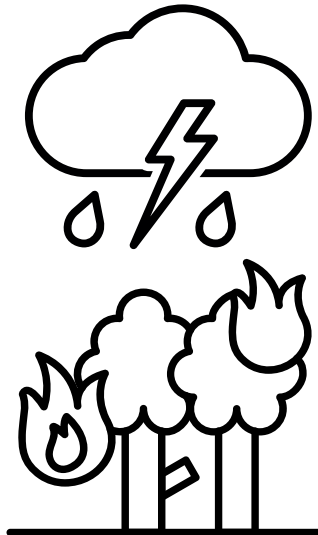

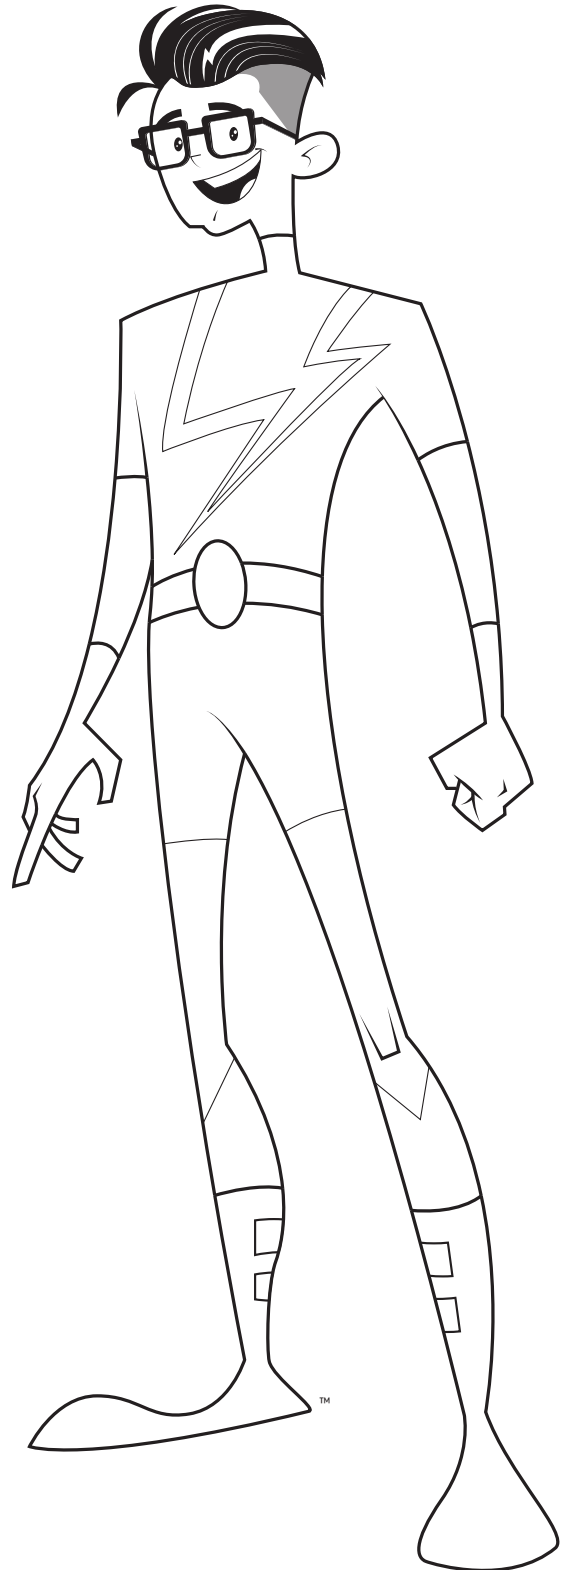

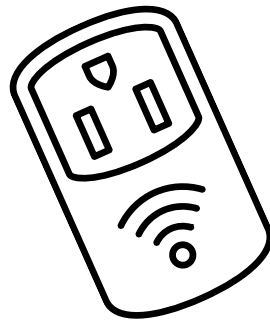

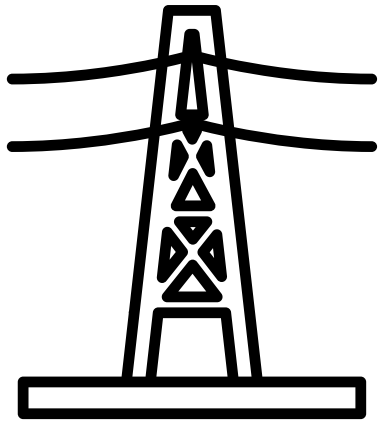

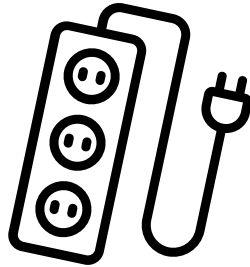

Power lines are not for touching.  
On the power lines, write **S** for safe or **NS** for not safe.

For safety, go inside when there is a storm outside.  
On the storm cloud, write **S** for safe or **NS** for not safe.
